

NITA

3.0

THIS.CHANGES.EVERYTHING!

RAISING THE BAR (AND THE BOX!)

Forever famous for unsurpassed quality and workmanship, Nita 3.0 machines are now even more fortified and efficient to use than ever before. Conveniently placed “eye-level” electrical boxes house industry-leading technology like 100% non-proprietary Servo programmable drives that keep the completely synchronized machines humming while fully integrated **In-Frame Wiring** shield the precise electrical signals from messy and dangerous spills. Protecting ~~our~~ your investment is always top of mind!

LABELING WARRIOR

Ultra-rugged and bold, the Nita 3.0 **SUMO-FRAME™** demonstrates Nita’s pledge to engineering and building only the **BEST** labeling machine money can buy. The fully welded Stainless Steel structure supports a reinforced **SureFire™** labeling platform guaranteed to **outperform** anything you have ever used. Sumo Strong!

ORANGE IS THE NEW BLACK

As in **you** will be further **in the black** on your bottom line with unrivaled levels of production uptime and unparalleled ease of use and operator satisfaction. Nita 3.0 machines reflect the pride we take in our company brand with subtle but sexy design touches. Nita...putting some **Beauty** into the **Beast!**

BUILT-IN TECHNICIAN!

We’ve trumped ourselves this time. Already renowned as the technological leaders in automatic labeling equipment, Nita 3.0 machines now feature Hi-Res color HMI control screens that allow for our service reps to log in via an internet connection and completely **adjust and troubleshoot** your machine **remotely**. You may never meet a Nita technician in-person again! Add in the full color on-screen PDF pics and tips and an optional scanner for quick recipe recall and Nita once again redefines the words **SIMPLY EASY™!**

THE COLOR OF HAPPY

Nothing makes product changeovers as quick and easy as Nita’s legendary rulers and quick-adjust recipe systems ... except of course changeovers in **COLOR!** Every station that needs an adjustment when changing over or setting up containers is indicated with a specific **color and letter** code that relates to a specific value stored in the color HMI screen. Simply dial in the value at each adjustment station and you are good to go. Nita has now made “lightning-fast” changeovers **even faster!**

INTRODUCING THE

NITA 3.0

SMART LABELING SYSTEMS

At Nita we are **INSPIRED** by **YOU!** The incredible amount of hard work you dedicate to your company and craft drives us to go further. Your commitment to being the absolute best at what you do motivates us to continue developing better and more productive machines every single day. At Nita we take so much **PRIDE** in knowing the systems we engineer and manufacture play significant roles in enabling our clients to run the most efficient and highest producing facilities in the country. Mostly, we are honored to have every one of you as a part of the ever-growing Nita family. Thank you.
